Connect to Wi-Fi at home

- 1) Start your machine and login as normal
- 2) When logged in click on the Wi-Fi icon on the taskbar

3) Click onto the right arrow to see Wi-Fi connections and connect to your home Wi-Fi network

4) You will be asked for a username and password, this is the same login as your computer

S Cisco Secure Client	×			
Please enter your username and pase VPN Connection Required	ssword.			
Group: Username: barkerg	~	🕲 Cisco Secu	re Client —	• ×
Password: **********			AnyConnect VPN: Please enter your username and password.	
ОК	Cancel		✓ Co	onnect
		VPN Connect	tion Required	
		\$ ①		altalta cisco

5) You will now get a popup saying you have connected to AnyConnect VPN with a symbol showing a computer with a mouse where your Wi-Fi icon usually is.

6) Now run the network fix on the desktop to get access to your network drive and Public 2
